

# SOFTWARE DEVELOPMENT INTERSHIPS OFFER

We have **2 Software Development Internship** opportunities in Northern Ireland for computer science students!

Established in 2010 in **Belfast**, the host company is a leading provider of informatics software & imaging solutions. Their innovative systems are currently helping to increase efficiency and streamline operations in clinical laboratories across the world.

Following a recent acquisition, the host company has added digital pathology education software to its product portfolio and enhanced its digital pathology and artificial intelligence capabilities.

The students will be undertaking the following tasks with their mentor:

- Working as part of a team to build and test software applications from initial specification to final deployment and acceptance
- Automating tests using testing tools and scripts
- Functional, performance and stress testing of the product
- Commit to an automated CI/CD (Continuous Integration/Deployment) pipeline with high test coverage requirements

This internship is the perfect opportunity for computer science students with strong knowledge of C# or Java & desirably experience with Python & MS Azure. They will further develop their skills and gain international practical experience in the United Kingdom!

Please forward this exciting opportunity to your students and recent graduates.

**Don't miss the deadline, apply before the 26th of July!**

**Software Engineer in Test**

**Software Engineer in Test**

**(SDET) Internship**

**Software Development**

**Software Development**

**Internship**

At ESPA we aim to make the transition to come to a foreign country as easy and stress free as possible, especially in the current circumstances, so we always find the housing for the students and it will be paid for by the host company.

**There are no fees for students or universities to use our services.**

Would you be available for a quick chat? I'd like to learn more about your University, if there are any concerns about sending your students to the UK, and to discuss if there is a possibility for a cooperation in the future. [Please book a time in my diary.](#)

**Kind regards,  
Maarja Heinsoo**
