

Unofficial translation of the Degree Program and Examination Regulations
published in Amtliche Mitteilungen der Philipps-Universität Marburg (No. 37/2025)
on April 24, 2025. Translated with DeepL on August 6, 2025.

The Departmental Council of the Department of Social Sciences and Philosophy at Philipps-Universität Marburg adopted the following degree program and examination regulations on January 29, 2025 in accordance with § 50 (1) of the Hessian Higher Education Act (HessHG) in the version dated December 14, 2021 (GVBl. 2021, p. 931), last amended by Article 1 of the Act dated October 10, 2024 (GVBl. 2024 No. 56):

Degree program and examination regulations
for the degree program

„Applied Methods of Social Research“

leading to the degree

„Master of Arts (M.A.)“

Philipps-Universität Marburg

I. General information

§ 1 Scope of application

In addition to the General Regulations for master's degree programs at Philipps-Universität Marburg dated 13 September 2010 (Amtliche Mitteilungen der Philipps-Universität Marburg, No. 52/2010) in the currently valid version - hereinafter referred to as the General Regulations - these degree program and examination regulations govern the objectives, content, structure and organization of the degree program as well as the requirements and procedures for the examinations in the degree program "Applied Methods of Social Research" leading to the degree "Master of Arts (M.A.)".

§ 2 Goals of the degree program

Within two semesters, the Master of Arts in "Applied Methods of Social Research" imparts in-depth knowledge and practical skills in the field of social science research methods, enabling students to carry out independent research work. With a clear focus on practice-oriented methodological knowledge, it prepares students specifically for activities that require a high level of methodological and analytical understanding. Graduates are qualified for demanding tasks in social science research institutions, public institutions and civil society organizations. The degree program also enables entry into political consulting and the media. The successful completion of the degree also opens up the possibility of a doctorate and lays a solid foundation for an academic career.

The programme is aimed at applicants who have already acquired basic skills in descriptive and inferential statistics as well as in areas such as concept specification, operationalization, measurement, research designs, and the application of qualitative and quantitative analysis methods during their Bachelor's degree.

Building on this prior knowledge, the degree program offers a broad spectrum of methods. The focus is on deepening quantitative and qualitative research designs, supplemented by specialized methods such as statistical procedures, data visualizations, and qualitative discourse analysis. This methodological skills development is enhanced by insights into exemplary fields of research, including Inequality and Diversity, Digital Societies and International Politics and Conflict, in which the methods learned are applied in practice.

The degree program is both research- and application-oriented and focuses on the master's thesis as an independent research project. Graduates are able to work on socially and politically relevant issues in a systematic, theory-based and practice-oriented manner. Successful completion of the program qualifies students for a subsequent doctorate.

§ 3 Master's degree

(1) The master's examination is passed if all modules specified in § 6 have been successfully completed.

(2) Upon successful completion of the degree program in accordance with (1), the Department of Social Sciences and Philosophy shall award the academic degree "Master of Arts (M.A.)".

II. Program-related provisions

§ 4 Admission requirements

(1) The general admission requirement for the master's degree program is proof of a relevant Bachelor's degree in the field of social sciences or proof of a comparable domestic or foreign professionally qualifying university degree with an overall grade of at least 2.7. Proof must be provided that at least 10 credit points have been acquired in the field of social science methods, of which at least 5 credit points must be in the field of quantitative methods and/or statistics.

If no degree certificate with an overall grade is available by the application deadline, enrollment may be conditional. In the case of an underlying Bachelor's degree program with a scope of 240 credit points, the prerequisite is that proof of passed module examinations or partial module examinations amounting to at least 80% of the credit points required for the Bachelor's degree in question is provided. The proof must contain an average grade determined on the basis of the graded module examinations and partial module examinations within the scope of the 80% of the credit points required for the Bachelor's degree. Enrollment can only take place subject to the proviso that all coursework and examinations for the Bachelor's degree have been completed before the start of the master's degree program (deadline 30.09. for the start of the master's degree program in the winter semester) and proof of the degree certificate is provided by the end of the lecture period of the first semester.

(2) The question of relevance of the previous studies within the meaning of (1) is decided by the examination committee (§ 16).

(3) The examination committee (§ 16) also decides on the existence of the required credit points in accordance with (1).

(4) The question of the comparability of the university degree within the meaning of (1) shall be decided by the examination committee (§ 16).

(5) In addition, sufficient knowledge of English (level at least C1 according to the "Common European Framework of Reference for Languages") must be demonstrated, as the degree program is taught exclusively in English.

(6) In addition to the general admission requirements for the degree program, participation in individual modules or module parts may be made dependent on the

fulfillment of specific module admission requirements. In this case, the prerequisites are listed in the module list (Appendix 2) under "Prerequisites for participation".

(7) Particularly high-performing Bachelor's students may be permitted to complete modules from this consecutive master's degree program subject to available capacity. Up to two modules from the master's degree program amounting to a maximum of 12 LP can be recognized. The work completed must be recognized in the master's degree program upon application and submission of appropriate evidence.

§ 5 Academic advising

General academic advising is provided by the Central Student Counseling office (*Zentrale Allgemeine Studienberatung, ZAS*) of Philipps-Universität Marburg. Subject-specific academic advising is usually provided by the professors or by authorized persons.

§ 6 Degree program: structure, content, degree program curriculum and information

(1) The master's degree program "Applied Methods of Social Research" is divided into the study areas Research Methods, Research Fields and Master Thesis.

(2) The degree program consists of modules that are assigned to the various areas of study in accordance with (1). The following study structure results from the assignment of the modules, the degree to which they are compulsory and the calculated student workload in credit points (*Leistungspunkte, LP*):

	<i>Compulsory [PF] / Compulsory elective [WP]</i>	<i>Credit points</i>	<i>Comment</i>
Research Methods		24	
<i>Tool-Kit for Research*</i>	<i>PF</i>	12	
<i>Methods I*</i>	<i>PF</i>	6	
<i>Methods II*</i>	<i>PF</i>	6	
Research Fields		12	
<i>Inequality and Diversity</i>	<i>WP</i>	6	<i>Select 2 from 4</i>
<i>Digital Societies</i>	<i>WP</i>	6	
<i>International Politics and Conflict</i>	<i>WP</i>	6	
<i>Profile Modules*</i>	<i>WP</i>	6	
Master Thesis		24	
<i>Master Thesis</i>	<i>PF</i>	24	

Total		60	
--------------	--	-----------	--

* Import module according to Appendix 3: Import module list

(3) In the Research Methods study area, the methods modules serve to teach specific scientific methods that are used in the research fields and in particular in the master's thesis: They should enable students to translate questions into research designs and reflect on the application potential of advanced methods.

(4) The Research Fields study area serves to develop a profile, prepare the master's thesis and round off the degree program in an interdisciplinary/international manner. The modules of the compulsory elective area provide for an in-depth examination of central problem areas of the social sciences in the 21st century. In order to strengthen students' analytical skills and enable them to approach relevant fields of research, two modules must be completed in this area.

(5) The degree program is more research-oriented.

(6) The exemplary sequence of the modularized degree program is shown in the degree program curriculum (see Appendix 1).

(7) General information and regulations in their current form can be found on the program-related website at <http://www.uni-marburg.de/info-m-amsr>. In particular, the module handbook and the degree program curriculum can also be viewed there.

Furthermore, a list of the current import and export offers of the degree program is published.

(8) The assignment of the individual courses to the modules of the degree program can be found in the course catalog of the Philipps-Universität Marburg, which is available on the university's website.

§ 7 General standard program duration, promotion of excellence and start of studies

(1) The general standard program duration for the master's degree program "Applied Methods of Social Research" is 2 semesters. On the basis of these degree program and examination regulations, the department shall ensure a range of courses that enables students to complete all the coursework required to pass the degree program, including the completion of the thesis, within the general standard program duration.

(2) Students may only begin their studies in the winter semester.

§ 8 Study abroad

A voluntary study abroad period of one semester is not provided for.

§ 9 Structural variant of the degree program

The master's degree program "Applied Methods of Social Research" corresponds to the structural variant of a "single-subject degree program".

§ 10 Modules and credit points

The provisions of § 10 General Regulations apply.

§ 11 Practical modules and profile modules

(1) The master's degree program "Applied Methods of Social Research" does not include any practical modules.

(2) In all other respects, the provisions of § 11 General Regulations apply.

§ 12 Module and course registration and module and course deregistration

(1) Binding registration is generally required for modules and courses.

(2) The registration and deregistration procedure as well as the registration and deregistration deadlines will be announced in good time on the program-related website in accordance with § 6 (7). Module or course spots are allocated in accordance with § 13 of these degree program and examination regulations if capacities are limited.

§ 13 Access to compulsory elective modules or courses with limited participation options

(1) Admission numbers may be set for compulsory elective modules and courses by resolution of the departmental council if this is absolutely necessary to ensure orderly teaching and study and to achieve the educational objective. Each fixed number of participants shall be announced in an appropriate manner in good time before the start of the compulsory elective module or course.

(2) In the case of a compulsory elective module or a course with limited capacity, there is no entitlement to participation if the study of at least one other alternative compulsory elective module or another course is open.

(3) If the number of registrations for a compulsory elective module or course exceeds the number of spots available, a selection must be made. The selection is made by drawing lots.

In any case, it must be ensured that hardship cases, in particular those within the meaning of § 26 (1) and (2) (priority group 1) and students with a special interest in participation (priority group 2) are considered in advance within the framework of the available capacities. A special interest exists in particular for those students,

- for whom the compulsory elective module or the course is compulsory due to an internal specialization,
- who did not receive a spot in a previous semester despite registering, although the degree program curriculum provided for the compulsory elective module,
- who have unsuccessfully participated in the compulsory elective module or course, if repeated participation is mandatory for the repeat examination.

If, in individual cases, the available spots are not sufficient to consider the two priority groups, students in priority group 1 are to be given priority for admission; within the groups, the decision is then made by lot.

§ 14 Application of modules across degree programs

(1) Modules that are based on the provisions of other degree programs in terms of their offerings and examination regulations ("import modules") are provided. Further details on these modules are summarized in Appendix 3.

(2) Modules from the master's degree program "Applied Methods of Social Research", which can also be completed as part of other degree programs, are subject to the provisions of § 20 (4) of these degree program and examination regulations and § 14 (2) General Regulations.

§ 15 Coursework

§ 15 (1) General Regulations applies.

III. Examination-related provisions

§ 16 Examination committee

(1) The departmental council appoints the examination committee.

(2) The examination committee shall consist of

1. six members of the group of professors,
2. two members of the group of research assistants and
3. three members of the student group.

A deputy member shall be elected for each member.

(3) The term of office, the chairmanship, the quorum and other aspects are governed by § 16 General Regulations.

§ 17 Tasks of the examination committee and the examination administration

The provisions of § 17 General Regulations apply.

§ 18 Examiners and observers

The provisions of § 18 General Regulations apply.

§ 19 Recognition of coursework and examinations

The provisions of § 19 General Regulations apply.

§ 20 Module list, import and export module list and module handbook

(1) The modules to be completed as part of the degree program are summarized in the module list (Appendix 2) and in the list of import modules (Appendix 3). The type of modules, their allocation to the various areas of the degree program, options between modules and within modules, the requirements for participation in the modules as well as the credit points to be earned, the examination type, the assessment and the competence objectives can be found in these lists and in § 6. In the case of import modules, this information can be found in the original module lists of the degree program offering them.

(2) The offer of import modules is subject to the proviso that changes to the modules can be made by the teaching units offering them (in particular, for example, due to accreditation). This does not require an amendment to these degree program and examination regulations. Such changes will be announced by the examination committee in good time on the program-related website. In addition, the examination committee may decide that further modules may be admitted as import modules, either generally or in individual cases upon justified request, provided that the department or institution offering the course agrees.

(3) Further information with detailed module descriptions and the current range of import modules are published in a module handbook on the degree program website.

(4) The export modules are summarized in Appendix 4.

§ 21 Examinations

The provisions of § 21 General Regulations apply.

§ 22 Examination types and durations, completion times, scopes

(1) Written examinations shall take the form of

- Term papers,

- Learning portfolios,
- the Master's thesis.

(2) Oral examinations shall take the form of

- Individual examinations

(3) The following durations or completion times and scopes are assigned to the aforementioned forms of examination. In the case of written examinations that are not completed under supervision, the total time available for completion should cover a longer period of time. Term papers and learning portfolios should have a minimum completion time of two and a maximum of four weeks (in the sense of an actual examination duration). Regulations on individual forms of examination not listed here can be found in Appendix 2 (module list).

(4) For the imported modules according to Appendix 3 or examinations provided for therein, the corresponding regulations of the degree program and examination regulations of the degree programs from which the modules are imported apply in their currently valid version.

(5) In all other respects, the provisions of § 22 General Regulations apply.

§ 23 Master's thesis

(1) The master's thesis (final thesis) is a compulsory component of the degree program. Together with a colloquium, it forms a joint final module. The master's thesis must be written in English or can also be written in other languages in consultation with the examination committee.

(2) The master's thesis is an examination paper in which the candidate should demonstrate the ability to independently work on a defined problem from the field of social sciences using scientific methods within a specified period of time. The aim is for the candidate to demonstrate that she or he can develop a research design and apply methods of empirical social research. The master's thesis is worth 21 credit points. The final module also includes coursework worth 3 credit points, which is to be achieved through an individual oral presentation in a colloquium.

(3) The master's thesis must be written as an individual thesis.

(4) Admission to the master's thesis does not require any special admission requirements.

(5) The candidate proposes an advisor and an authorized examiner as the first reviewer for the master's thesis. The candidate also has the right to nominate the second reviewer. The advisor and the first reviewer may be the same person. The proposals do not justify any claim. The first reviewer must be appointed by the examination committee for the assessment of master's theses. The topic of the master's thesis is submitted to the examination committee by the first reviewer and assigned by the examination committee. If the candidate is unable to find a advisor and a first reviewer, the chair of

the examination committee shall appoint the advisor and the first reviewer and ensure that a topic for the master's thesis is issued in good time.

(6) The master's thesis must be completed within the completion time of 5 months. The topic of the thesis must be such that it can be completed within this period. An extension of the completion time by a maximum of 20% (e.g., due to unforeseen problems in the procurement of literature or data) is possible upon justified request by the candidate; it does not lead to the award of additional credit points. The completion time begins with the issue of the topic; the time of issue must be recorded. The topic should be issued in good time so that no extension of the completion time occurs even if an extension is granted.

(7) The master's thesis must be submitted on time to the examination committee or an body designated by it in two printed copies and in digital form in accordance with the examination committee's specifications. The time of submission must be recorded. When submitting the thesis, the candidate must confirm in writing that she or he has written the thesis independently and has not used any sources or aids other than those specified. If the master's thesis is not submitted on time, it is deemed to have been assessed as "insufficient" (0 points) in accordance with § 28 (2) General Regulations.

(8) The master's thesis is failed if the overall grade is not at least 5 points ("sufficient") in accordance with § 28 (2) General Regulations; it may be repeated once.

The examination committee shall ensure that the candidate receives a new topic within six weeks of being notified of the failure. The topic may only be returned within the period specified in § 23 (7) clause 1 General Regulations if the candidate did not make use of this option when writing the master's thesis for the first time. A second repetition of the master's thesis is excluded.

(9) Grade compensation for a failed master's thesis is not permitted.

(10) In all other respects, the provisions of § 23 General Regulations apply.

§ 24 Examination dates, examination registration and deregistration

(1) The examination committee shall announce the time periods for examinations and repeat examinations. Dates for written exams (*Klausuren*) and other examination dates that are equally valid for all participants in a module are announced in the course catalog. Examination dates to be agreed individually (e.g., presentations) are listed in the course catalog with the note "n. V."

(2) Examinations shall take place as part of the respective module courses or immediately following them. If examinations take place following module courses, they should generally be offered in a two to three-week examination period at the end of the lecture period or at the beginning or end of the subsequent lecture-free period. As a rule, written exams (*Klausuren*) should take place on the same day of the week and at the same time as a corresponding module course.

The examiner should also provide for the preparation of examination papers, such as term papers, during the lecture-free period.

(3) The first date for retaking examinations must be set in such a way that successful participation ensures continued study in the following semester.

(4) Binding registration is required to take part in an examination. The examination committee shall announce the deadlines and the form of registration in an appropriate manner at least 4 weeks before the start of the registration period. Admission to the examination shall be refused if the registration deadline is not met or if admission requirements are not met.

(5) A binding examination registration can be withdrawn without giving reasons, provided this is done within the deadline set by the examination committee. These deadlines and the form of withdrawal will be announced together with the corresponding regulations for registration.

(6) Upon reasoned request to the examination committee, alternative dates will be set for examinations that cannot be taken due to religious work bans. Proof of membership of the relevant religious community must be submitted with the application. The application must be submitted at least four weeks before the examination date.

§ 25 Time requirements to earn credits

The provisions of § 25 General Regulations apply.

§ 26 Family support, accommodations for hardships and informal part-time study

(1) In courses and examinations, consideration must be given to stress caused by pregnancy and the upbringing of children, by the care for relatives in need of care and by a disability or chronic illness of the student. The nature and severity of the burden must be proven by the student in good time to the person responsible for the course or the chairperson of the examination committee with suitable documentation. In cases of doubt, the examination committee shall decide upon written application. In cases of illness, the examination committee may request a medical certificate from a public health officer. It must be possible to take advantage of the statutory maternity protection periods and parental leave periods.

(2) If a student can credibly demonstrate that she or he is unable to take the examination in the intended form in whole or in part due to a disability, a chronic illness, the care for relatives in need of care, pregnancy or the upbringing of children, the examination committee shall compensate for this disadvantage by taking appropriate measures, such as extending the completion time or changing the examination procedure.

(3) In accordance with the applicable legal regulations, the degree program can be carried out in whole or in part as informal part-time studies upon application. In the case of an approved informal part-time study program, there is no entitlement to the

provision of a special teaching and study program. In any case, academic advising is strongly recommended before taking up informal part-time studies.

§ 27 Absence, withdrawal, fraud, violation of regulations

(1) Coursework is deemed to not have been passed or an examination is deemed to be "insufficient" (0 points) in accordance with § 28 (2) General Regulations if the candidate misses an examination date that is binding for her or him without good cause or if she or he withdraws from coursework or an examination that has already been started without good cause. The same applies if coursework or an examination is not completed within the specified completion time.

(2) The important reason asserted for the absence or withdrawal must be reported immediately in writing and made credible. In the event of illness, a medical certificate must be submitted. In this case, the existing examination results are recognized.

(3) If the candidate attempts to influence the result of coursework or examinations by means of fraud or unauthorized aids, the coursework in question is deemed to not have been passed or the examination in question is deemed to be "insufficient" (0 points) in accordance with § 28 (2) General Regulations. A candidate who disrupts the orderly completion of coursework or an examination may be excluded from continuing with the coursework or examination by the examiner or the supervising person; in this case, the coursework is also deemed to not have been passed or the examination is deemed to be "insufficient" (0 points) in accordance with § 28 (2) General Regulations. In serious cases, the examination committee may exclude the candidate from taking further examinations, so that the right to take examinations in the degree program expires.

(4) Decisions in accordance with (1) to (3) must be communicated to the candidate immediately in writing, stating the reasons and providing information on legal remedies.

§ 28 Grading and grade composition

The provisions of § 28 General Regulations apply.

§ 29 Nonbinding examination option

A nonbinding examination option is not provided.

§ 30 Repetition of examinations

(1) Passed examinations cannot be repeated.

(2) Examinations that have not been passed may be repeated twice.

(3) It is permissible to change a compulsory elective module that has been definitively failed once.

(4) § 23 (12) clauses 1 and 2 General Regulations (master's thesis and colloquium) and § 21 (3) clause 4 General Regulations (compensated partial module examinations) remain unaffected.

§ 31 Loss of the right to take the examination and final failure

(1) The right to take examinations in the degree program in which the student is enrolled is permanently lost, in particular if

1. an examination has not been passed after all retake attempts have been exhausted,
2. there is a serious case of deception pursuant to § 27 (3) clause 3.

(2) A notice of final failure and the associated loss of the right to take the examination will be issued, which must be accompanied by information on legal remedies.

§ 32 Invalidity of examination results

The provisions of § 32 General Regulations apply.

§ 33 Certificate

The provisions of § 33 General Regulations apply.

§ 34 Diploma

The provisions of § 34 General Regulations apply.

§ 35 Diploma Supplement

The provisions of § 35 General Regulations apply.

§ 36 Transcript of Records and complete grade record

The provisions of § 36 General Regulations apply.

IV. Final provisions

§ 37 Inspection of the examination documents

The provisions of § 37 General Regulations apply.

§ 38 Effective date and transitional provisions

(1) These regulations come into force on the day after their publication in the Official Notices of Philipps-Universität Marburg.

(2) These degree program and examination regulations apply to all students beginning their studies from the winter semester 2025/26.

Marburg, March 31, 2025

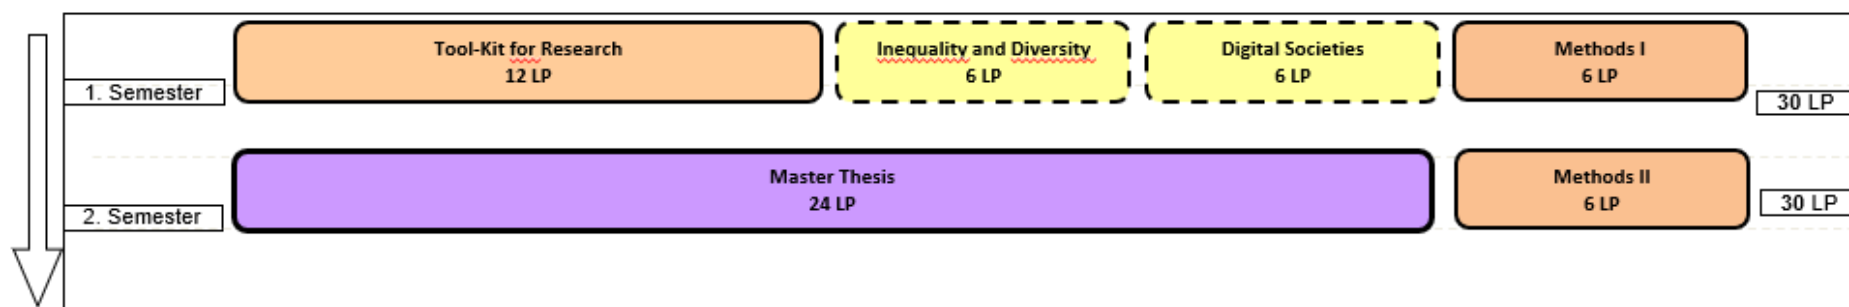

signed.

Prof. Dr. Annette Henninger
Dean of the Department of
Social Sciences and Philosophy
Philipps-Universität Marburg

Appendix 3: Import module list

The module offerings listed below can be selected at the time of the resolution on these degree program and examination regulations. Alternatively or additionally, courses from the Marburg Skills study area can be selected. In accordance with §14 (1) of the General Regulations, these modules are subject to the specifications of the degree program and examination regulations within which the modules are offered (in particular with regard to qualification objectives, prerequisites, credit points and examination modalities). The possible combinations of modules may be determined by the teaching unit offering them.

The catalog of selectable offerings can be changed or supplemented by the examination committee, in particular if the range of offerings provided by the departments at Philipps-Universität Marburg changes. Such changes will be published by the examination committee on the respective degree program website. In individual cases or in general, taking up the offerings listed below may be subject to prior academic advising or binding registration. In the event of capacity restrictions, the respective provisions of the degree program and examination regulations apply. Otherwise, no guarantee is given that the offerings listed below will actually be provided and can be attended.

Upon justified application by the student, it is permissible to approve additional import modules beyond the regular offer in individual cases; this requires the consent of the department or body providing the offerings.

The current import offerings are published as an export offer on the program website of the department offering the module.

Students should take advantage of the relevant information and advisory services offered by the department offering the module before taking up the offering.

Any participation requirements or recommendations as well as combination rules must be observed. If the module provider has specified combination rules and created export packages, there is effectively only a limited range of modules available, depending on the scope of your own import window.

At the time of the last resolution in the departmental council on the present degree program and examination regulations, an agreement existed for the following modules:

The following modules can be used for the <i>Research Methods</i> study area in the scope of 24 LP		
Offer from the degree program	Module title	LP
M.A. International Political and Social Science Research	Tool-Kit for Research	12

	Methods I	6
	Methods II	6

The following modules can be used for the <i>Research Fields</i> study area <i>in the scope of 6 LP</i>		
Offer from the degree program	Module title	LP
B.Sc. "Economics, Institutions, and Behavior" (FB 02)	All export modules of the exporting degree program	
M.Sc. Sustainable Development (FB 19)	All export modules of the exporting degree program	

Appendix 4: Export module list

The current export offerings are published as an export offer on the program website of the department offering the module.

Any participation requirements or recommendations as well as combination rules must be observed. If the module provider has specified combination rules and created export packages, there is effectively only a limited range of modules available, depending on the scope of your own import window.

The list represents the export offerings at the time of the resolution on these degree program and examination regulations. The catalog of the export offerings can be changed or supplemented by the examination committee, in particular if the export offerings change. Such changes will be published by the examination committee on the degree program website in accordance with § 6.

§ 1 Export of curricular modules to other degree programs

The following modules in accordance to Appendix 2 can also be completed as part of other degree programs, provided that this has been agreed with the department or departments in whose degree program or programs these modules can be selected.

Inequality and Diversity
Digital Societies
International Politics and Conflict
