

Sixth NaDiMa Online Dialogue

Using Stata for Climate Change Research

Time: 17th December 2020, 10:00 am - 4:00 pm CET

Aims:

- To gain basic understanding of fixed effects regression and its application areas & create reproducible, well-documented Stata do-files
- To gain basic understanding of spatial econometrics & its applications in Stata
- Replication of two research papers

Target group:

- Master & PhD students with interests in empirical research on climate change

Prerequisites:

- Basic knowledge of uni- and bivariate statistics and a working knowledge of Stata

Workshop capacity:

- 20 participants (first come, first served)

Instructors:

Phoebe W. Ishak
John F. Kennedy Institute for
North American Studies, FU Berlin

Tamara Bogatzki
WZB Berlin Social Science Center
