

Honors Degree Program

in Artificial Intelligence and Entrepreneurship

Demand for AI-focused and trained talent has nearly doubled in the last two years! Given the rise of AI and the current numbers of AI-trained specialists, the gap will even widen in the years to come.

The Goethe University Frankfurt, Philipps University Marburg, TechQuartier in cooperation with the Technical University Darmstadt, have created a free joint education program for university students focusing on Artificial Intelligence and Entrepreneurship. The Honors Degree Program is designed to augment traditional coursework with emerging innovation and entrepreneurship classes.

- **Open to post-graduate students from Goethe University Frankfurt, Philipps University Marburg and TU Darmstadt.**
- **The program starts 1 September and ends 17 December, 2021.**
- **It will be integrated into the Hessian AI-Tech Campus.**
- **Professors from all three universities will teach classes.**
- **The program is in English.**

Benefits of the Program

Certificated upon completion

Earn shareable ECTS credits

Hands-on real life challenges

Network with academic disciplines and emerging industries professionals

Work in a team

Be guided by experts/mentors

The Curriculum

You will learn about AI and Entrepreneurship and will have the chance to delve into AI in Medicine, GeoAI and FinTech. You will have the opportunity to apply your knowledge straight away into the practical Lab-to-Market module, where you will solve real-life challenges provided by companies and startups.

Through a mix of videos, readings, assessments, and hands-on activities you can earn up to 24ECTS. Upon completion, you will receive a certificate to share with your academic and professional network.
