
Introduction to Behavioral Economics (Winter 2026/27)

Description:

Behavioral Economics emerged out of a number of empirical and experimental puzzles and can improve the behavioral predictions of economic models. The field is growing rapidly and offers quite diverse topics and applications. This course will focus on some core issues.

Contents:

- 1) Intratemporal decision-making without risk
- 2) Beliefs
- 3) Intratemporal decision-making under risk
- 4) Intertemporal decision-making without risk
- 5) Social preferences
- 6) Strategic Interaction
- 7) Behavioral Economics and Welfare
