Documentation Paper:

Representative Survey on Inflation and Knowledge about Economic Issues in Germany Conducted in 2025

Abstract This paper provides background information on the questionnaires and basic descriptive statistics for a representative survey of the German population, conducted on our behalf by Dynata in February–March 2025. The survey covers a range of topics related to inflation and economic issues, including: 1) ‘official’ and ‘personalised’ inflation perceptions and expectations, 2) subjective and objective knowledge about monetary policy and financial matters, and 3) an experiment assessing whether supply constraint scenarios affect laypersons’ inflation expectations. A broad set of socio-demographic and economic indicators was also collected.

JEL classification: D12, D84, E31, E71

Keywords: Household survey, Inflation perception, Inflation expectation, Supply disruptions, Economic literacy, Germany

1. Introduction

This paper provides background information, the questionnaires, and basic descriptive statistics for a representative survey of the German population conducted on our behalf by Dynata in February–March 2025. Using a randomised experiment integrated into an Internet-based survey, we elicited households' opinions on various aspects, including (i) 'official' and 'personal' inflation perceptions and expectations before and after a supply constraint scenario, and (ii) subjective and objective knowledge about monetary policy and financial issues. We also collected a broad range of socio-demographic indicators.

This survey, along with the embedded experiment, was preregistered, and the underlying hypotheses were described in the AEA RCT registry on 12 February 2025 (Households' Inflation Expectations Under Supply Constraints; RCT ID AEARCTR-0015110; <https://www.socialscienceregistry.org/trials/15110>).

The purpose of this paper is to present full documentation of the survey, and its data will be analysed in a series of research papers.

This documentation paper is structured as follows: Section 2 describes the implementation of the surveys as well as the treatments. Appendix A and Appendix B contain the German and the English-translated versions of the questionnaire on inflation perceptions, inflation expectations, and economic knowledge, respectively. Appendix C reports absolute and relative frequency counts for questions in Appendix A. Appendix D presents the collected socio-demographic variables.

2. The Survey

A. Survey design

The survey began with an initial set of questions on quota variables, designed to target a representative sample of the German population, followed by questions eliciting quantitative measures of both 'official' and personal inflation perceptions and expectations. Respondents were then provided information about the supply problem in Germany's retail sector in 2022 and were randomly assigned to a scenario treatment related to future supply shortages. The survey continued with a set of questions used to measure how respondents updated their beliefs on inflation expectations and how they viewed the situation of empty shelves and missing product. The rest of the survey included sets of questions to collect respondents' subjective and objective economic literacy (regarding monetary policy and financial issues), socio-demographic characteristics, political opinions, and subjective life satisfaction with the economic situation.

The survey was conducted by Dynata – an international market research and survey-data company. The survey targeted individuals aged 18 or older and was conducted over two

weeks. Specifically, the first week was from 14 to 21 February 2025 and consisted of 1,025 qualified responses. The second week was from 26 February to 4 March and included 1,007 participants. In total, 305 responses were disqualified due to low data quality scores.

Methodologically, the survey is based on quota sampling from Dynata's access panel. Reflecting the 2021 German Microcensus, respondents were selected according to sex, age, household size, community size, region (Nielsen regions) and household net income (6 quota variables). Dynata's panel diversity is ensured through a variety of recruitment channels, including mobile channels, social media sites, apps, targeted campaigns, integrated channels, loyalty programs, and special interest sites. This approach makes it possible to better map certain age groups or specific demographics, including people who might not actively sign up to survey panels themselves. All participants, regardless of their recruitment source, undergo a detailed profiling and validation process to ensure that only 'real' respondents with accurate personal information participate in online studies. Dynata's global research science team strives to ensure the best possible mix of sources within their panel. Before participating in a survey, participants are informed about the compensation for completing the survey, which is based on the estimated average length of the interview. While all participants are rewarded with panel points, the types of redeemable rewards vary by recruitment channel and include shopping vouchers, charitable donations, and rewards such as frequent flyer miles.

The survey questions were asked in an online questionnaire. Dynata quality control encompasses different areas and brings an array of solutions to fraud control, using both traditional and advanced fraud detection techniques including artificial intelligence and machine learning. As the parent company of Imperium, a fraud prevention provider, Dynata integrates Imperium's tools, metrics, and technologies with its own strategies for recruitment, panel management, and participant experience. This integration enables Dynata to monitor respondent behaviour even when the survey is not hosted on its own platform.

Dynata's strategy involves collecting data at each touchpoint – gathering 100+ data points per interaction – to manage respondent reputation throughout the survey process. The system focuses on collecting and acting on both real-time and predictive data regarding how respondents will interact before and within a survey. For example, the new Imperium Quality Score uses machine learning to score respondents based on several survey behaviour indicators signalling disengagement and fraud, creating a quality score for each participant. These scores are then fed into Dynata's panel database and used for the ongoing quality assessment of each respondent.

Table 1 compares important characteristics of our survey sample with those of the general German population. The correspondence is very high, indicating that the sample data are representative of the German population aged 18 to 90.

Table 1: Comparison of sample to population

Variable	Population distribution in %	Sample distribution in %	Frequency in sample	Variable	Population distribution in %	Sample distribution in %	Frequency in sample
Age Group				Gender			
18-29	19	18.8	382	Male	50	49.8	1012
30-39	18	18.7	380	Female	50	49.9	1013
40-49	17	16.9	343	Non-binary or gender diverse	0	0.3	7
50-59	23	22.5	457

Appendices A and B contain the full text of the questions on inflation perceptions, inflation expectations, supply conditions, and economic literacy, presented in the original German version (Appendix A) and in the English translation (Appendix B). Appendix C provides summary statistics tables showing the distributions of variables quoted in Appendix B. The socio-demographics, political opinions, and subjective life satisfaction with the economic situation are set out in Appendix D.

This survey examines people's inflation perceptions and expectations under supply constraint scenarios, as well as their knowledge of monetary policy and financial issues. Particular emphasis is placed on understanding how supply constraints influence household inflation expectations. Some questions were adopted from earlier surveys conducted in Germany (Hayo and Neuenkirch 2018; Hayo et al. 2018; Hayo 2022; Hayo 2023; Hayo et al. 2025), allowing the responses to be comparable across surveys.

The survey began with seven questions collecting key socio-demographic characteristics of the respondents, including age (Question 1), gender (Question 2), residential area (Questions 3 and 4), household size (Question 5), education (Question 6), and household net income (Question 7).

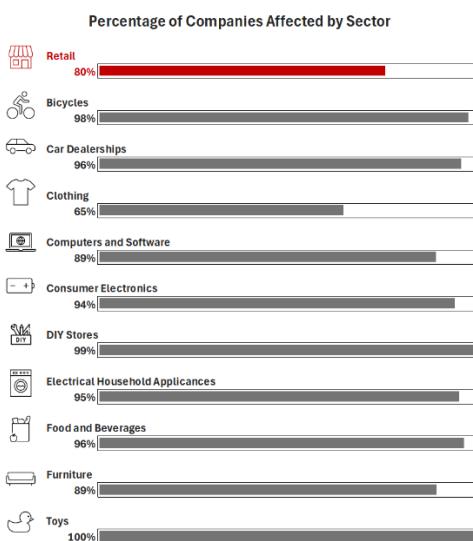

After providing the definitions of 'official' and personal inflation expectations, Questions 8 and 9 collect household perceptions of the 'official' and personal inflation rates for 2024, respectively. Questions 10a and 11a ask about expectations for both inflation rates in 2025, respectively. Unless respondents state that they do not form expectations about the 'official' inflation rate in Question 10a, follow-up items to Question 10a ask the lowest (Question 10b) and the highest (Question 10c) values respondents expect for future inflation. Similarly, Questions 11b and 11c follow up on Question 11a.

Question 12 allows respondents to assess the current supply conditions, providing context for the information about supply chain disruption in Germany in 2022. This is followed by questions about awareness of the issue (Question 13), the frequency with which they experienced empty shelves (Question 14), and how seriously they viewed the issue personally (Question 15). After Question 12, all respondents received a text and an infographic reporting that 80% of firms in Germany in mid-2022 were unable to deliver their orders. The text and infographic were reproduced from a June 2022 press release by ifo (Wohlrabe, 2022) and are presented in Table 1.

Table 1. Factual information

We will now give you some information about the supply chain disruption in Germany in 2022. Please read the following information carefully before continuing with the survey.

A leading economic research institute, the ifo Institute in Munich, reported two years ago on problems with the delivery of goods to German stores. In May 2022, most stores (around 80%) reported that they did not receive their orders on time and could not restock their shelves as usual. As the chart shows, the situation was similar for many other products, such as cars, household appliances, and toys.

Have you understood the information you have just received? If you are not sure, please read the text again. Thank you for your effort!

The respondents were randomly divided into three treatment groups in a 3:3:2 ratio. The first group received a hypothetical news item describing a scenario of a two-month supply disruption. The second group received a scenario of a twelve-month supply disruption. The third group was the control (baseline) group, which received no supply disruption scenario. Question 16 asks all respondents how serious they perceive the scenario to be for the economy before giving them the opportunity to revise their inflation expectations in Question 17. If they choose to revise, Questions 18a to 18c and 19a to 19c are follow-up items collecting the mode (a), minimum (b), and maximum (c) of post-treatment ‘official’ and personal inflation expectations, respectively. Question 20 is an open-ended item eliciting direct responses about emotions and actions taken when respondents encounter missing or unavailable desired products.

Question 21 explores how participants interpret and respond to survey questions about inflation expectations when the definitions are not clarified. In Question 22, interviewees are

asked about their main source of information when forming expectations about future inflation rates (Hayo and Neuenkirch, 2018).

Questions 23 to 27 assess financial literacy. They were originally developed by von Rooij et al. (2011) and Lusardi and Mitchell (2014) and have also been replicated in Hayo et al. (2025).

Questions 28 to 32 measure monetary policy literacy in Germany. They were introduced in a survey conducted in 2011, as documented by Hayo and Neuenkirch (2018), and have been replicated in Hayo et al. (2018) as well as in Hayo (2022, 2023).

Questions 33 to 48 ask additional questions about socio-demographic and economic characteristics, political views, and subjective well-being, and are presented in Appendix D.

B. Treatments

After answering the first 15 questions, respondents were randomly assigned to either the baseline group or one of two treatment groups in a 3:3:2 ratio. Those in the baseline group ($N = 502$) received no supply shortage scenario. Treatment 1 group ($N = 762$) and Treatment 2 group ($N = 768$) were presented with scenarios of two-month and twelve-month supply shortages, respectively. The exact wording used in each treatment group is provided in Table 2.

Table 1. Treatments

Treatment 1 group (N=762) receives a hypothetical scenario of a 2-month supply problem (temporary supply shortage):

Before you continue with the survey, please imagine the following fictitious press release:

INTERRUPTION TO THE SUPPLY CHAIN IN THE GERMAN RETAIL SECTOR - PROBABLY FOR TWO MONTHS

Delivery delays and supply bottlenecks are expected to occur again in Germany. Experts estimate that these supply problems will be resolved within the next two months.

Have you understood the information you have just received? If you are not sure, please read the text again. Thank you for your effort!

Treatment 2 group (N=768) receives a hypothetical scenario of a 12- month supply problem (prolonged supply shortage):

Before you continue with the survey, please imagine the following fictitious press release:

INTERRUPTION TO THE SUPPLY CHAIN IN THE GERMAN RETAIL SECTOR - PROBABLY FOR A YEAR

Delivery delays and supply bottlenecks are expected to occur again in Germany. Experts estimate that these supply problems will be resolved within the next twelve months.

Have you understood the information you have just received? If you are not sure, please read the text again. Thank you for your effort!

Baseline or Control group (N=502) receives a hypothetical scenario of no supply problem (no supply shortage):

Before you continue with the survey, please imagine the following fictitious press release:

NO PROBLEMS WITH THE SUPPLY CHAIN IN THE GERMAN RETAIL SECTOR

It is expected that there will be no problems with the delivery and supply of goods in Germany. Experts estimate that the supply situation in Germany will be stable and normal over the next 12 months.

Have you understood the information you have just received? If you are not sure, please read the text again. Thank you for your effort!

Appendix A: Questionnaire of the survey in original language (German)

Inflationsraten

Als nächstes möchten wir Sie nach Ihrer Meinung darüber befragen, wie sich die „*offizielle*“ Inflationsrate und Ihre *persönliche* Inflationsrate im vergangenen Jahr entwickelt haben beziehungsweise im kommenden Jahr entwickeln werden.

Die „*offizielle*“ *Inflationsrate* wird anhand des deutschen Verbraucherpreisindexes gemessen, den das Statistische Bundesamt erhebt. Mit dem Verbraucherpreisindex wird die Veränderungsrate der Preise berechnet, über die normalerweise in den Nachrichten berichtet wird.

Ihre *persönliche Inflationsrate* bezieht sich auf die Veränderungsrate der Preise für Güter und Dienstleistungen, die Sie selbst regelmäßig kaufen, wie z. B. Ihre täglichen Einkäufe, Benzin, Miete oder Strom.

Inflationsentwicklung

Jetzt möchten wir Sie bitten, sich über die Entwicklung der Inflationsrate genauer Gedanken zu machen.

Frage 8:

Wie hoch war Ihrer Meinung nach die „*offizielle*“ Inflationsrate in **2024**, die anhand des Verbraucherpreisindexes berechnet wird?

Wenn Sie glauben, dass der Verbraucherpreisindex gesunken ist, dann geben Sie bitte einen negativen Prozentsatz an.

Bitte geben Sie einen Wert für die „*offizielle*“ Inflationsrate in **2024** hier ein: _____ %

- Ich weiß den Wert nicht.
- Ich mache mir keine Gedanken zur Entwicklung der „*offiziellen*“ Inflationsrate.

Frage 9:

Wie hoch war Ihrer Meinung nach Ihre *persönliche* Inflationsrate in **2024**, d. h. die Preisänderungsrate, die Sie selbst erleben?

Wenn Sie glauben, dass die Preise, mit denen Sie typischerweise konfrontiert sind, im Durchschnitt gesunken sind, dann geben Sie bitte einen negativen Prozentsatz an.

Bitte geben Sie einen Wert für Ihre *persönliche* Inflationsrate in **2024** hier ein: _____ %

- Ich weiß den Wert nicht.

- Ich mache mir keine Gedanken zur Entwicklung meiner *persönlichen* Inflationsrate.

Inflationserwartungen

Wir möchten Sie nun bitten, sich Gedanken über die Inflationsrate in der nahen Zukunft zu machen.

Frage 10:

Welchen konkreten Wert erwarten Sie in **2025** für die „*offizielle*“ Inflationsrate, welche anhand des Verbraucherpreisindexes berechnet wird?

Wenn Sie glauben, dass der Verbraucherpreisindex sinken wird, dann geben Sie bitte einen negativen Prozentsatz an.

Frage 10a:

Bitte geben Sie den Wert für die „*offizielle*“ Inflationsrate ein, den Sie in **2025** erwarten: _____ %

- Ich weiß den Wert nicht.
- Ich bilde keine Erwartungen über die Entwicklung der „*offiziellen*“ Inflationsrate.

Bei Frage 10a können die Teilnehmer entweder eine Zahl angeben oder „Ich weiß den Wert nicht“ auswählen. Wenn sie dies tun, sollten sie mit Frage 10b und Frage 10c fortfahren.

*Wenn sie „Ich bilde keine Erwartungen über die Entwicklung der „*offiziellen*“ Inflationsrate.“ wählen, fahren Sie mit Frage 11 fort.*

Wenn Q10a einen Wert hat, Text anzeigen:

Sie erwarten, dass die „*offizielle*“ Inflationsrate im Jahr **2025** <insert value from Q10a>% ist.

Da die Zukunft unsicher ist, was sind die niedrigsten und höchsten Werte, die Sie erwarten?

Wenn Q10a einen DK-Wert hat „Ich kenne den Wert nicht“. Text anzeigen:

Sie konnten keine konkrete Erwartung für die „*offizielle*“ Inflationsrate im Jahr 2025 angeben. Aber vielleicht könnten Sie den niedrigsten und höchsten Wert angeben, den Sie erwarten?

Frage 10b:

den niedrigsten Wert an, den Sie erwarten: _____ %

- Ich weiß den Wert nicht.

Frage 10c:

den höchsten Wert an, den Sie erwarten: _____ %

- Ich weiß den Wert nicht.

Frage 11:

Welchen konkreten Wert erwarten Sie in **2025** für Ihre *persönliche* Inflationsrate, d. h. die Preisänderungsrate, die Sie selbst erleben?

Wenn Sie glauben, dass die Preise, mit denen Sie typischerweise konfrontiert werden, im Durchschnitt sinken werden, können Sie einen negativen Prozentsatz angeben.

Frage 11a:

Bitte geben Sie einen Wert, den Sie erwarten: _____ %

- Ich weiß den Wert nicht.
 Ich bilde keine Erwartungen über die Entwicklung meiner *persönlichen* Inflationsrate.

Hinweis: Bei Frage 11a können die Teilnehmer entweder eine Zahl angeben oder „Ich weiß den Wert nicht“ auswählen. Wenn sie dies tun, sollten sie mit Frage 11b und Frage 11c fortfahren. Wenn sie „Ich bilde keine Erwartungen über die Entwicklung der persönlichen Inflationsrate.“ wählen, fahren Sie mit Frage 12 fort.

Wenn Q11a einen Wert hat, Text anzeigen:

Sie erwarten, dass die „persönliche“ Inflationsrate im Jahr **2025** <insert value from Q11a>% ist.

Da die Zukunft unsicher ist, was sind die niedrigsten und höchsten Werte, die Sie erwarten?

Wenn Q11a einen DK-Wert hat „Ich kenne den Wert nicht“. Text anzeigen:

Sie konnten keine konkrete Erwartung für die „persönliche“ Inflationsrate im Jahr **2025** angeben. Vielleicht können Sie aber angeben, was die niedrigsten und höchsten Werte sind, die Sie erwarten?

Frage 11b:

den niedrigsten Wert an, den Sie erwarten: _____ %

- Ich weiß den Wert nicht.

Frage 11c:

den höchsten Wert an, den Sie erwarten: _____ %

- Ich weiß den Wert nicht.

Frage 12:

Wie beurteilen Sie das aktuelle Warenangebot in den Geschäften im Vergleich zum Vorjahr?

Das Warenangebot ist heute:

- | | | | | | |
|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Viel geringer | Etwas
geringer | Unverändert | Etwas höher | Viel höher | Weiß nicht |
| <input type="radio"/> |

Frage 13:

Ist diese Information für Sie persönlich neu?

- Ja
- Nein

Frage 14:

Haben Sie schon einmal in einem Geschäft vor leeren Regalen gestanden?

- Ja, das ist mir ständig passiert
- Ja, das ist mir oft passiert
- Ja, das ist mir manchmal passiert
- Ja, das ist mir aber nur selten passiert
- Nein, das ist mir nie passiert

Frage 15:

Wie schwerwiegend oder unbedeutend ist das Problem fehlender Waren in den Geschäften für Sie persönlich?

- Sehr schwerwiegend
- Schwerwiegend
- Weder schwerwiegend noch unbedeutend
- Eher unbedeutend
- Sehr unbedeutend
- Weiß nicht

Frage 16:

Wie ernst oder unbedeutend empfinden Sie die in unserer erfundenen Pressemitteilung dargestellte Situation im Hinblick auf die gesamte deutsche Wirtschaft?

- Sehr ernst
- Ernst
- Weder ernst noch unbedeutend
- Eher unbedeutend
- Sehr unbedeutend
- Weiß nicht.

Frage 17:

Angenommen, es käme tatsächlich zu der beschriebenen Liefersituation während sich ansonsten an der aktuellen wirtschaftlichen Situation nichts ändert:

Möchten Sie Ihre bisherige Meinung zur Entwicklung der „*offiziellen*“ Inflationsrate und Ihrer *persönlichen* Inflationsrate (also der Preisänderungsrate, die Sie selbst erleben) in 2025 ändern oder beibehalten?

Bitte wählen Sie die Option, die Ihrer derzeitigen Meinung am ehesten entspricht.

<p>Frage 17a: „<i>Offizielle</i>“ Inflationsrate, also die Inflationsrate für die Konsumentenpreise, die vom Statistischen Bundesamt berechnet wird.</p>	<ul style="list-style-type: none"><input type="radio"/> Nein, ich möchte meine Meinung nicht ändern.<input type="radio"/> Ja, ich möchte meine Meinung ändern.<input type="radio"/> Weiß nicht.
<p>Frage 17b: Ihre <i>persönliche</i> Inflationsrate, also die Preissteigerungen, die Sie selbst erleben.</p>	<ul style="list-style-type: none"><input type="radio"/> Nein, ich möchte meine Meinung nicht ändern.<input type="radio"/> Ja, ich möchte meine Meinung ändern.<input type="radio"/> Weiß nicht.

Frage 18:

Filter: Nur für Befragte, die in Frage 17a „Ja, ich möchte meine Meinung ändern.“ ausgewählt haben.

Angesichts der angenommenen Liefersituation haben Sie angegeben, Ihre Meinung zur „offiziellen“ Inflationsrate ändern zu wollen.

Auf den Skalen sehen Sie die Werte, die Sie zuvor beantwortet haben. Wie genau würden Sie Ihre Erwartungen für die „offizielle“ Inflationsrate in 2025 anpassen?

Frage 18a:

Bitte passen Sie den neuen Wert an, den Sie erwarten: _____ %

Ihr vorherige Wert war: <insert value from Q10a>% or kein Wert

Frage 18b:

Bitte passen Sie den niedrigsten Wert an, den Sie erwarten: _____ %

Ihr vorherige Wert war: <insert value from Q10b>% or kein Wert

Frage 18c:

Bitte passen Sie den höchsten Wert an, den Sie erwarten: _____ %

Ihr vorherige Wert war: <insert value from Q10c>% or kein Wert

- Ich würde gerne meine Antwort anpassen, aber ich bin mir nicht sicher wie.

Frage 19:

Filter: Nur für Befragte, die in Frage 17b „Ja, ich möchte meine Meinung ändern.“ ausgewählt haben.

Angesichts der angenommenen Liefersituation haben Sie angegeben, Ihrer persönlichen Inflationsrate ändern zu wollen.

Auf den Skalen sehen Sie die Werte, die Sie zuvor beantwortet haben. Wie genau würden Sie Ihre Erwartungen für Ihre persönliche Inflationsrate in 2025 anpassen?

Frage 19a:

Bitte passen Sie den neuen Wert an, den Sie erwarten: _____ %

Ihr vorherige Wert war: <insert value from Q11a>% or kein Wert

Frage 19b:

Bitte passen Sie den niedrigsten Wert an, den Sie erwarten: _____ %

Ihr vorherige Wert war: <insert value from Q11b>% or kein Wert

Frage 19c:

Bitte passen Sie den höchsten Wert an, den Sie erwarten: _____ %

Ihr vorherige Wert war: <insert value from Q11c>% or kein Wert

- Ich würde gerne meine Antwort anpassen, aber ich bin mir nicht sicher wie.

Frage 20:

Wie fühlen Sie sich und was tun Sie, wenn Sie nicht finden, was Sie kaufen wollten?

Bitte beschreiben Sie kurz, wie Sie sich dabei fühlen und wie Sie in einer solchen Situation handeln.

Ich fühle mich

Ich tue

Frage 21:

Viele Umfragen zu Inflationserwartungen unterscheiden nicht klar zwischen „*offizieller*“ Inflationsrate, welche anhand des Verbraucherpreisindexes berechnet wird und *persönlicher* Inflationsrate, d. h. den Preisänderungen, die Sie selbst erleben.

Wenn Sie eine Frage zu Ihren Inflationserwartungen beantworten müssten, bei der dieser Unterschied nicht klar erkennbar ist, würden Sie diese Frage eher im Hinblick auf die „*offizielle*“ Inflationsrate oder Ihre *persönliche* Inflationsrate beantworten?

- Ich würde eher davon ausgehen, dass sich die Frage auf meine *persönliche* Inflationsrate bezieht.
- Ich würde eher davon ausgehen, dass sich die Frage auf die „*offizielle*“ Inflationsrate bezieht
- Ich würde eine Art Durchschnitt zwischen den beiden Inflationsraten berechnen.
- Ich wäre zu verwirrt, um eine Antwort zu geben und würde „weiß nicht“ wählen.

Frage 22:

Was ist Ihre wichtigste Informationsquelle bei der Bildung von Erwartungen über die zukünftige Inflationsrate?

- Eigenes Einkaufserlebnis.
- Eigene Beobachtung von Preisen in Geschäften oder online.
- Zeitung/Zeitschrift.
- Radio/TV.
- Internet.

- Soziale Netzwerke (z.B.: Facebook, Instagram, X...).
- Gespräche mit Freunden/Familie/Kollegen.
- Ich informiere mich nicht über die Inflationsrate.
- Weiß nicht.

Wirtschaftliche Kenntnisse

Als nächstes interessieren wir uns für Ihr allgemeines Verständnis von Finanzen und Geldpolitik.

Frage 23:

Im Alltag müssen wir uns oft mit finanziellen Fragen beschäftigen, wie zum Beispiel Rechnungen bezahlen, Geld sparen oder einen Kredit aufnehmen.

Wie gut oder schlecht schätzen Sie Ihr eigenes Wissen über finanzielle Dinge ein?

Bitte wählen Sie die Antwort, die am besten Ihren Eindruck über Ihr Wissen in Finanzfragen widerspiegelt.

Sehr schlecht	Schlecht	Weder schlecht noch gut	Gut	Sehr gut
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Frage 24:

Stellen Sie sich vor, dass Sie ein Sparkonto besitzen, auf welches Sie 5% Zinsen pro Jahr erhalten. Die Inflationsrate beträgt 6% pro Jahr.

Wie viel können Sie sich nach einem Jahr mit dem Geld auf diesem Sparkonto kaufen?

- Mehr als heute
- Genauso viel wie heute
- Weniger als heute
- Weiß nicht

Frage 25:

Bitte beurteilen Sie, ob folgende Aussage wahr oder falsch ist:

„Der Kauf einer Aktie eines einzelnen Unternehmens führt normalerweise zu einer sichereren Rendite als der Kauf eines Aktienfonds“.

- Wahr
- Falsch
- Weiß nicht

Frage 26:

Welche der folgenden Anlageformen führt in der Regel langfristig (z. B. über 10 Jahre oder mehr) zur höchsten Rendite?

- Sparbuch / Sparkonto
- Schuldverschreibungen, festverzinsliche Anleihen und Sparbriefe
- Aktien
- Weiß nicht

Frage 27:

Welche der folgenden Anlageformen weist in der Regel die höchsten Wertschwankungen im Laufe der Zeit auf?

- Sparbuch / Sparkonto
- Schuldverschreibungen, festverzinsliche Anleihen und Sparbriefe
- Aktien
- Weiß nicht

Frage 28:

Die Europäische Zentralbank EZB ist für die gemeinsame Geldpolitik aller Euroländer zuständig.

Wie gut oder schlecht schätzen Sie Ihr eigenes Wissen über die EZB ein?

Bitte wählen Sie die Antwort, die am besten Ihren Eindruck über Ihr Wissen in die EZB widerspiegelt.

Sehr schlecht	Schlecht	Weder schlecht noch gut	Gut	Sehr gut
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Frage 29:

Welche der folgenden Aufgaben ist Ihrer Meinung nach die wesentliche Aufgabe der EZB?

Die wesentliche Aufgabe der EZB ist es, ...

- ... das Wachstum im Euroraum zu fördern.
- ... die Arbeitslosigkeit im Euroraum zu bekämpfen.
- ... die Preisstabilität im Euroraum zu gewährleisten.
- ... den Mitgliedstaaten der Europäischen Union Kredite bereitzustellen.
- ... den Wechselkurs zwischen dem Euro und dem US-Dollar zu kontrollieren.
- Weiß nicht.

Frage 30:

Im Eurogebiet leihen sich die Geschäftsbanken (z. B. Deutsche Bank, Commerzbank, Sparkassen, Volksbanken, usw.) Geld von der Europäischen Zentralbank zu einem bestimmten Zinssatz (Hauptrefinanzierungssatz). Die Geschäftsbanken verleihen dieses Geld dann zu einem höheren Zinssatz weiter an Haushalte und Unternehmen.

Wissen Sie, wie hoch ungefähr der Zinssatz ist, den die EZB von den Geschäftsbanken verlangt? Bitte geben Sie den Wert in Prozent an!

_____ %.

- Weiß nicht.

Frage 31:

Wer bestimmt Ihrer Meinung nach über die Festlegung dieses Zinssatzes?

- Die EZB, unabhängig von den Regierungen der Euroländer.
- Die EZB, anschließend bedarf es einer Zustimmung der Regierungen der Euroländer.
- Die EZB und die Regierungen der Euroländer gemeinsam.
- Die Regierungen der Euroländer, anschließend führt die EZB die Entscheidung aus.
- Weiß nicht.

Frage 32:

Die Geschäftsbanken leihen sich zu einem festgelegten Zinssatz Geld bei der EZB (Europäische Zentralbank). Angenommen, man erwartet, dass die Preise im Euroraum in Zukunft stark ansteigen werden.

Wie sollte sich dann Ihrer Meinung nach der Zins verhalten?

- Der Zins sollte sinken.
- Der Zins sollte gleichbleiben.
- Der Zins sollte ansteigen.
- Weiß nicht.

Appendix B: Questionnaire of the survey in English

Inflation rates

Next, we would like to ask you for your opinion on how the 'official' inflation rate and your personal inflation rate have developed in the past year or will develop in the coming year.

The 'official' inflation rate is measured using the German consumer price index, which is compiled by the Federal Statistical Office. The consumer price index is used to calculate the rate of change in prices, which is normally reported in the news.

Your personal inflation rate refers to the rate of change in the prices of goods and services that you regularly buy yourself, such as your daily groceries, gasoline, rent or electricity.

Inflation development

Now we would like to ask you to think about the development of the inflation rate in more detail.

Question 8:

What do you think the 'official' inflation rate was in 2024, calculated using the consumer price index?

If you believe that the consumer price index has fallen, please enter a negative percentage.

Please enter a value for the 'official' inflation rate in 2024 here _____ %

- I don't know the value.
- I am not concerned about the development of the 'official' inflation rate.

Question 9:

What do you think your personal inflation rate was in 2024, i.e. the rate of price change you experience yourself?

If you believe that the prices you typically face have fallen on average, please enter a negative percentage.

Please enter a value for your personal inflation rate in 2024 here: _____ %

- I do not know the value.
- I am not concerned about the development of my personal inflation rate.

Inflation expectations

We would now like to ask you to think about the inflation rate in the near future.

Question 10:

What specific value do you expect the 'official' inflation rate to be in 2025, which is calculated using the consumer price index?

If you believe that the consumer price index will fall, please enter a negative percentage.

Question 10a:

Please enter the value for the 'official' inflation rate that you expect in 2025: ____%

- I do not know the value.
- I do not form any expectations about the development of the 'official' inflation rate.

For question 10a, participants can either enter a number or select 'I don't know the value'. If they do this, they should continue with question 10b and question 10c.

If they select 'I do not form any expectations about the development of the "official" inflation rate', continue with question 11.

If Q10a has a value, show text:

You expect the 'official' inflation rate in 2025 to be <insert value from Q10a>%.

Since the future is uncertain, what are the lowest and highest values you expect?

If Q10a has a DK value 'I don't know the value'. Show text:

You could not give a specific expectation for the 'official' inflation rate in 2025. But perhaps you could indicate the lowest and highest value you expect?

Question 10b:

the lowest value you expect: _____ %

- I don't know the value.

Question 10c:

the highest value you expect: _____ %

- I do not know the value.

Question 11:

What specific value do you expect your personal inflation rate to be in 2025, i.e. the rate of price change that you yourself will experience?

If you believe that the prices you are typically confronted with will fall on average, you can enter a negative percentage.

Question 11a:

Please provide a value that you expect: _____ %

- I do not know the value.
- I do not form any expectations about the development of my personal inflation rate.

Note: For question 11a, participants can either enter a number or select 'I don't know the value'. If they do this, they should continue with question 11b and question 11c. If they select 'I do not form any expectations about the development of the personal inflation rate', continue with question 12.

If Q11a has a value, show text:

You expect the 'personal' inflation rate in 2025 to be <insert value from Q11a>%.

Since the future is uncertain, what are the lowest and highest values you expect?

If Q11a has a DK value "I don't know the value". Show text:

You could not give a specific expectation for the 'personal' inflation rate in 2025. However, perhaps you could indicate what the lowest and highest values are that you expect?

Question 11b:

Indicate the lowest value you expect: _____ %

- I do not know the value.

Question 11c:

indicate the highest value you expect: _____ %

- I do not know the value.

Question 12:

How would you rate the current range of goods on offer in the stores compared to last year?

The range of goods on offer today is:

Much lower	Slightly lower	Unchanged	Slightly higher	Much higher	Don't know
<input type="radio"/>					

Question 13:

Is this information new to you personally?

- Yes
- No

Question 14:

Have you ever stood in front of empty shelves in a store?

- Yes, this has happened to me all the time
- Yes, this has often happened to me
- Yes, that has happened to me sometimes
- Yes, but it only happened to me rarely
- No, that has never happened to me

Question 15:

How serious or insignificant is the problem of missing goods in stores for you personally?

- Very serious
- Serious
- Neither serious nor insignificant
- Insignificant
- Very insignificant
- Don't know

Question 16:

How serious or insignificant do you feel the situation presented in our made-up press release is with regard to the German economy as a whole?

- Very serious
- Serious
- Neither serious nor insignificant
- Insignificant
- Very insignificant
- Don't know

Question 17:

Assuming that the supply situation described would occur while nothing else changes in the current economic situation:

Would you like to change or maintain your previous opinion on the development of the 'official' inflation rate and your personal inflation rate (i.e. the rate of price change that you experience yourself) in 2025?

Please select the option that best corresponds to your current opinion.

Question 17a: 'Official' inflation rate, i.e. the inflation rate for consumer prices calculated by the Federal Statistical Office.	<input type="radio"/> No, I do not want to change my opinion. <input type="radio"/> Yes, I would like to change my opinion. <input type="radio"/> Don't know.
Question 17b: Your personal inflation rate, i.e. the price increases you experience yourself.	<input type="radio"/> No, I do not want to change my opinion. <input type="radio"/> Yes, I would like to change my opinion. <input type="radio"/> Don't know.

Question 18:

Filter: Only for respondents who selected 'Yes, I would like to change my mind' in question 17a.

In view of the assumed delivery situation, you have indicated that you would like to change your opinion on the 'official' inflation rate.

On the scales you can see the values that you previously answered. How exactly would you adjust your expectations for the 'official' inflation rate in 2025?

Question 18a:

Please adjust the new value you expect: _____ %

Your previous value was: <insert value from Q10a>% or no value

Question 18b:

Please adjust to the lowest value you expect: _____ %

Your previous value was: <insert value from Q10b>% or no value

Question 18c:

Please adjust the highest value you expect: _____ %

Your previous value was: <insert value from Q10c>% or no value

- I would like to adjust my answer, but I'm not sure how.

Question 19:

Filter: Only for respondents who selected 'Yes, I would like to change my mind.' in question 17b.

In view of the assumed delivery situation, you have indicated that you would like to change your personal inflation rate.

On the scales you can see the values that you previously answered. How exactly would you adjust your expectations for your personal inflation rate in 2025?

Question 19a:

Please adjust the new value you expect: _____ %

Your previous value was: <insert value from Q11a>% or no value

Question 19b:

Please adjust the lowest value you expect: _____ %

Your previous value was: <insert value from Q11b>% or no value

Question 19c:

Please adjust the highest value you expect: _____ %

Your previous value was: <insert value from Q11c>% or no value

- I would like to adjust my answer, but I'm not sure how.

Question 20:

How do you feel and what do you do when you can't find what you wanted to buy?

Please briefly describe how you feel and what you do in such a situation.

I feel

I do

Question 21:

Many surveys on inflation expectations do not make a clear distinction between the 'official' inflation rate, which is calculated using the consumer price index, and your personal inflation rate, i.e. the price changes you experience yourself.

If you had to answer a question about your inflation expectations where this difference is not clearly recognizable, would you rather answer this question with regard to the 'official' inflation rate or your personal inflation rate?

- I would rather assume that the question refers to my personal inflation rate.
- I would rather assume that the question refers to the 'official' inflation rate
- I would calculate some sort of average between the two inflation rates.
- I would be too confused to give an answer and would choose 'don't know'.

Question 22:

What is your most important source of information when forming expectations about the future rate of inflation?

- Own shopping experience.
- Own observation of prices in stores or online.
- Newspaper/magazine.
- Radio/TV.
- Internet.
- Social networks (e.g. Facebook, Instagram, X...).
- Conversations with friends/family/colleagues.
- I do not inform myself about the inflation rate.
- Don't know.

Economic knowledge

Next, we are interested in your general understanding of finance and monetary policy.

Question 23:

In everyday life, we often have to deal with financial issues, such as paying bills, saving money or taking out a loan.

How good or bad do you rate your own knowledge of financial matters?

Please choose the answer that best reflects your impression of your financial knowledge.

- | | | | | |
|-----------------------|-----------------------|-----------------------|-----------------------|-----------------------|
| Very poor | Bad | Neither bad nor good | Good | Very good |
| <input type="radio"/> |

Question 24:

Imagine that you have a savings account on which you receive 5% interest per year. The inflation rate is 6% per year.

How much can you buy with the money in this savings account after one year?

- More than today
- The same as today
- Less than today
- Don't know

Question 25:

Please rate whether the following statement is true or false:

'Buying a share in a single company usually results in a safer return than buying an equity fund'.

- True
- False
- Don't know

Question 26:

Which of the following forms of investment usually leads to the highest return in the long term (e.g. over 10 years or more)?

- Savings book / savings account
- Bonds, fixed-interest bonds and savings certificates
- Shares
- Don't know

Question 27:

Which of the following forms of investment usually has the highest fluctuations in value over time?

- Savings book / savings account
- Bonds, fixed-interest bonds and savings certificates
- Shares
- Don't know

Question 28:

The European Central Bank (ECB) is responsible for the common monetary policy of all euro countries.

How good or bad would you rate your own knowledge of the ECB?

Please choose the answer that best reflects your impression of your knowledge of the ECB.

Very poor	Bad	Neither bad nor good	Good	Very good
<input type="radio"/>				

Question 29:

In your opinion, which of the following is the essential task of the ECB?

The main task of the ECB is to ...

- ... to promote growth in the euro area.
- ... to combat unemployment in the euro area.
- ... to ensure price stability in the euro area.
- ... to provide loans to the member states of the European Union.
- ... to control the exchange rate between the euro and the US dollar.
- Don't know.

Question 30:

In the euro area, commercial banks (e.g. Deutsche Bank, Commerzbank, Sparkassen, Volksbanken, etc.) borrow money from the European Central Bank at a certain interest rate (main refinancing rate). The commercial banks then lend this money to households and companies at a higher interest rate.

Do you know approximately how high the interest rate is that the ECB charges commercial banks? Please state the value in per cent!

_____ %.

- Don't know.

Question 31:

In your opinion, who determines this interest rate?

- The ECB, independently of the governments of the euro countries.
- The ECB, followed by the approval of the governments of the euro countries.
- The ECB and the governments of the euro countries together.

- The governments of the euro countries, then the ECB carries out the decision.
- Don't know.

Question 32:

Commercial banks borrow money from the ECB (European Central Bank) at a fixed interest rate. Suppose that prices in the euro area are expected to rise sharply in the future.

How do you think the interest rate should be?

- The interest rate should fall.
- The interest rate should stay the same.
- The interest rates should rise.
- I don't know.

Appendix C - Absolute and Relative Frequencies

Question 8:

What do you think the ‘official’ inflation rate was in 2024, calculated using the consumer price index?

Answers	Frequency	Per cent	Answers	Frequency	Per cent

Question 12:

How would you rate the current range of goods on offer in the stores compared to last year?

The range of goods on offer today is:

Answers	Frequency	Per cent
Much lower	67	3.3
Slightly lower	444	21.85
Unchanged	1,013	49.85
Slightly higher	344	16.93
Much higher	143	7.04
Don't know	21	1.03
Total	2,032	100

Question 13:

Is this information new to you personally?

Answers	Frequency	Per cent
Yes	1,020	50.2
No	1,012	49.8
Total	2,032	100

Question 14:

Have you ever stood in front of empty shelves in a store?

Answers	Frequency	Per cent
Yes, this has happened to me all the time	113	5.56
Yes, this has often happened to me	387	19.05
Yes, that has happened to me sometimes	702	34.55
Yes, but it only happened to me rarely	603	29.68
No, that has never happened to me	227	11.17
Total	2,032	100

Question 15:

How serious or insignificant is the problem of missing goods in stores for you personally?

Answers	Frequency	Per cent
Very serious	92	4.53
Serious	492	24.21
Neither serious nor insignificant	797	39.22
Insignificant	479	23.57
Very insignificant	145	7.14
Don't know	27	1.33
Total	2,032	100

Question 16:

How serious or insignificant do you feel the situation presented in our made-up press release is with regard to the German economy as a whole?

Answers	Frequency	Per cent
Very serious	321	15.8
Serious	911	44.83
Neither serious nor insignificant	538	26.48
Insignificant	183	9.01
Very insignificant	45	2.21
Don't know	34	1.67
Total	2,032	100

Question 17:

Assuming that the supply situation described would occur while nothing else changes in the current economic situation:

Would you like to change or maintain your previous opinion on the development of the 'official' inflation rate and your personal inflation rate (i.e. the rate of price change that you experience yourself) in 2025?

Question 17a:

Answers	Frequency	Per cent
No, I do not want to change my opinion.	362	17.81
Yes, I would like to change my opinion.	1,316	64.76
Don't know	354	17.42
Total	2,032	100

Question 17b:

Answers	Frequency	Per cent
No, I do not want to change my opinion.	323	15.90
Yes, I would like to change my opinion.	1,381	67.96
Don't know	328	16.14
Total	2,032	100

Question 18: *Filter: Only for respondents who selected 'Yes, I would like to change my mind' in question 17a.*

In view of the assumed delivery situation, you have indicated that you would like to change your opinion on the 'official' inflation rate.

On the scales you can see the values that you previously answered. How exactly would you adjust your expectations for the 'official' inflation rate in 2025?

Question 21:

Many surveys on inflation expectations do not make a clear distinction between the 'official' inflation rate, which is calculated using the consumer price index, and your personal inflation rate, i.e. the price changes you experience yourself.

If you had to answer a question about your inflation expectations where this difference is not clearly recognizable, would you rather answer this question with regard to the 'official' inflation rate or your personal inflation rate?

Answers	Frequency	Per cent
I would rather assume that the question refers to my personal inflation rate.	437	21.51
I would rather assume that the question refers to the 'official' inflation rate	1039	51.13
I would calculate some sort of average between the two inflation rates.	345	16.98
I would be too confused to give an answer and would choose 'don't know'.	211	10.38
Total	2,032	100

Question 22:

What is your most important source of information when forming expectations about the future rate of inflation?

Answers	Frequency	Per cent
Own shopping experience	550	27.07
Own observation of prices in stores or online.	527	25.94
Newspaper/magazine.	104	5.12
Radio/TV.	225	11.07
Internet.	263	12.94
Social networks (e.g. Facebook, Instagram, X...).	90	4.43
Conversations with friends/family/colleagues.	77	3.79
I do not inform myself about the inflation rate.	141	6.94
Don't know.	55	2.71
Total	2,032	100

Question 23:

In everyday life, we often have to deal with financial issues, such as paying bills, saving money or taking out a loan. How good or bad do you rate your own knowledge of financial matters?

Please choose the answer that best reflects your impression of your financial knowledge.

Answers	Frequency	Per cent
Very poor	58	2.85
Bad	230	11.32
Neither bad nor good	824	40.55
Good	741	36.47
Very good	179	8.81

Total	2,032	100
-------	-------	-----

Question 24:

Imagine that you have a savings account on which you receive 5% interest per year. The inflation rate is 6% per year.

How much can you buy with the money in this savings account after one year?

Answers	Frequency	Per cent
More than today	120	5.91
The same as today	330	16.24
Less than today	1,431	70.42
Don't know	151	7.43
Total	2,032	100

Question 25:

Please rate whether the following statement is true or false:

'Buying a share in a single company usually results in a safer return than buying an equity fund'.

Answers	Frequency	Per cent
TRUE	215	10.58
FALSE	1247	61.37
Don't know	570	28.05
Total	2032	100

Question 26:

Which of the following forms of investment usually leads to the highest return in the long term (e.g. over 10 years or more)?

Answers	Frequency	Per cent
Savings book / savings account	277	13.63
Bonds, fixed-interest bonds and savings certificates	368	18.11
Shares	1,035	50.94
Don't know	352	17.32
Total	2,032	100

Question 27:

Which of the following forms of investment usually has the highest fluctuations in value over time?

Answers	Frequency	Per cent
Savings book / savings account	251	12.35
Bonds, fixed-interest bonds and savings certificates	155	7.63
Shares	1,339	65.9
Don't know	287	14.12
Total	2,032	100

Question 28:

The European Central Bank (ECB) is responsible for the common monetary policy of all euro countries. How good or bad would you rate your own knowledge of the ECB?

Please choose the answer that best reflects your impression of your knowledge of the ECB.

Subjective monetary literacy	Frequency	Per cent
Very poor	173	8.51
Bad	509	25.05
Neither bad nor good	964	47.44
Good	340	16.73
Very good	46	2.26
Total	2,032	100

Question 29:

In your opinion, which of the following is the essential task of the ECB?

The main task of the ECB is to ...

Objective monetary literacy 2	Frequency	Per cent
... to promote growth in the euro area.	173	8.51
... to combat unemployment in the euro area.	509	25.05
... to ensure price stability in the euro area.	964	47.44
... to provide loans to the member states of the European Union.	340	16.73
... to control the exchange rate between the euro and the US dollar.	46	2.26
Don't know.		
Total	2,032	100

Question 30:

In the euro area, commercial banks (e.g. Deutsche Bank, Commerzbank, Sparkassen, Volksbanken, etc.) borrow money from the European Central Bank at a certain interest rate (main refinancing rate). The commercial banks then lend this money to households and companies at a higher interest rate.

Do you know approximately how high the interest rate is that the ECB charges commercial banks? Please state the value in per cent!

Question 31:

In your opinion, who determines this interest rate?

Objective monetary literacy 3	Frequency	Per cent
The ECB, independently of the governments of the euro countries.	911	44.83
The ECB, followed by the approval of the governments of the euro countries.	284	13.98
The ECB and the governments of the euro countries together.	318	15.65
The governments of the euro countries, then the ECB carries out the decision.	90	4.43
Don't know.	429	21.11
Total	2,032	100

Question 32:

Commercial banks borrow money from the ECB (European Central Bank) at a fixed interest rate. Suppose that prices in the euro area are expected to rise sharply in the future.

How do you think the interest rate should be?

Objective monetary literacy 4	Frequency	Per cent
The interest rate should fall.	823	40.5
The interest rate should stay the same.	409	20.13
The interest rate should rise.	464	22.83
Don't know.	336	16.54
Total	2,032	100
