

Refresh your knowledge!

You are going to study Economics at the Master level in Marburg and want to brush up your knowledge of basic methods? You are keen to train your economic intuition?

Here are some recommendations for reading. These books are either at an introductory level or an intermediate level.

Methods in Microeconomics

Riley, John G. (2012) Essential Microeconomics. Cambridge University Press.

There is webpage to complement the book that offers information and training on the mathematical skills necessary to get started in our programme (use the link "mathematical foundations" at the top of the page):

<http://www.essentialmicroeconomics.com/>

Econometrics

Maddala, G.S., Lahiri, K. (2007). Introduction to Econometrics. 4th Edition. John Wiley & Sons.

Math

Simon, Carl P., Blume, L. (1994). Mathematics for Economists. Norton.

Institutional Economics

Richter, R., Furubotn, E.G. (2005). Institutions and Economic Theory: The Contribution of the New Institutional Economics. 2nd Edition. University of Michigan Press.

There are many other good textbooks on microeconomics, econometrics, and math. Browse to find one that suits your needs best.
