employment:
full-time

The Philipps University, founded in 1527, offers multiple award-winning teaching for around 22,000 students and tackles the important issues of our time with excellent research across a broad spectrum of science.

The Center for Synthetic Microbiology (SYNMIKRO) is currently accepting applications for a third-party funded position as

Research assistant

The position is funded until September 30th 2026 and the starting date is as soon as possible. The position is full-time with salary and benefits commensurate with a public service position in the state Hesse, Germany (TV-H E 13).

The position is part of the NFDI4Microbiota consortium (<https://nfdi4microbiota.de>). It aims to support the scientific Community in the collection, processing, analysis and provision of microbiological research data as a central Support point of contact according to the FAIR principles.

Tasks:

- Coordinate and implement quality and provenance services for microbiology research data such as omics and bioimaging data
- Development and implementing data management policies
- Integration of databases and terminology services
- Communication with the scientific community
- Participation in bioinformatic projects

This is a project position not to be restricted according to § 2 (1) WissZeitVG. An extension is sought and will be subject to further funding approvals.

Profile:

- MSc-degree or equivalent qualification in natural sciences
- Experience in scientific work and the development of tools, APIs or workflows
- Knowledge in research data management, especially in the area of omics and bioimaging data
- Very good command of written and spoken English
- Experience using Linux-based systems as well as programming experience are advantageous
